DETAILED ACTION

1. Claims 1-2 are presented for examination.

Specification

2. The disclosure is objected to because of the following informalities:

(a) Brief Description of the Several Views of the Drawing(s): See MPEP § 608.01(f).

A reference to and brief description of the drawing(s) as set forth in 37 CFR 1.74.

Appropriate correction is required.

Drawings

3. The drawings are objected to because the drawing should include legends for items 1-7.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an

Art Unit: 2858

application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Double Patenting

4. Claims 1 and 2 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1 and 2 of copending Application No. 10/797,944. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Bakhtiari et al. (US Patent No. 5,886,534 and Bakhtiari hereinafter).

Art Unit: 2858

7. As to claim 1, Bakhtiari discloses a method of generation and homodyne detection comprising:

selecting a length of electric path, wherein an equal value is selected of both electrical paths between shunt arm in waveguide T-connection and generated diode in one collinear arm; and in the second collinear arm between the same shunt arm and detection diode (Fig. 6; col. 9, lines 37-42).

8. As to claim 2, Bakhtiari discloses a generation and homodyne detection system having: a generation Gunn diode seating connected with one collinear arm, and detection diode seating connected with the second collinear arm significant by waveguide T-connection between generation diode seating and detection diode seating (Figs 6 and 7A; Col. 2, lines 43-51 and col. 10, lines 12-24).
